SROC plot results

TABLE: ESTIMATES

SAUC matplot resuts

PLOT: SROC curve and corresponding SAUC

PLOT: Probit of α and β

(A) $(\hat{c}_1, \hat{c}_2)$

(B) $(c_1, c_2) = (1/\sqrt{2}, 1/\sqrt{2})$

(C) $(c_1, c_2) = (1, 0)$

(D) $(c_1, c_2) = (0, 1)$

y-axis: $p = \Phi(\beta t + \alpha)$

x-axis: t

Legend: $p = 0.8$, $p = 0.6$, $p = 0.4$

PLOT: Funnel plot

Legend:
- ○ Unpublished studies
- ● Published studies with cutoff values of 3.05–43.5 (MFI/cell)
- ○ Published studies with other cutoff value
- ● Published studies with cutoff values of 1800–10000 (mol/cell)
- ● Published studies with cutoff values 1.19–4.39
